

Assessing Risk (IRMR 6.7) **(WGG Offshore Academy Bachelor's Degree Level 6 in IRMR)**

Target Group

The 6.7 Assessing Risk training unit is directed towards individuals who are, or may be required to manage, direct, and conduct strategic governance and social responsibilities planning in the context of incident response for an organisation.

Course Elements & Competency

The following unit elements will be delivered:

Element 6.7.1 Identify hazards.

Element 6.7.2 Unacceptable risk.

Element 6.7.3 Identify, analyse and implement risk mitigation actions.

Element 6.7.4 Documentation.

Course Outline

6.7.1 Identify hazards	<ul style="list-style-type: none"> • Analyzing work area conditions • Analyzing relevant safety systems • Types and scope of unresolved hazards
6.7.2 Assess risk and identify unacceptable risk	<ul style="list-style-type: none"> • Determining the consequences of events • Criteria for the acceptability/ unacceptability of risk • Evaluating risk against criteria of '<i>unacceptable risk</i>'
6.7.3 Identify, analyse and implement risk mitigation actions	<ul style="list-style-type: none"> • Risk treatment options • Preliminary analysis of feasible options • Analyzing feasible options and resource requirements • Selecting the most appropriate action • Planning course of action • Implementing course of action
6.7.4 Documentation	<ul style="list-style-type: none"> • Communications • <i>Records and reports</i>

Learning Outcomes

To successfully complete this unit delegates must be able to:

- Identify hazards and potential operability problems.
- Assess impact of risk and determine alternative strategies.
- Assess risk information against established risk criteria in risk management plan.
- Develop a risk register and establish and maintain procedures for identifying hazards, and assessing and controlling risk.

Pre-requisite & Periodicity

There are no specific pre-requisites for the Understanding Environmental Conditions During Incident Response training. However, the delegate must be able to demonstrate suitable exposure within his/her sphere of influence therefore a good understanding of the resources used by the plant, the nature and source of pollutants and the waste materials produced by the plant. It also requires the operator to understand the impact of using resources, and the effect pollutants and waste can have on the local environment.

The Assessing Risk training unit is part of the Bachelor's Degree Level 6 program in Incident Response, Management & Recovery.

Aims & Objectives.

This subject describes the skills, knowledge and behaviours required to manage, direct and conduct strategic governance and social responsibilities planning for an organisation. This includes developing objectives and strategies, implementing initiatives and analysing, interpreting, and monitoring trends and processes. It focuses on making provision for inclusivity to ensure that Response, Management, and Recovery of Incidents are compliant & ensure an effective and organized outcome to all involved and concerned at all levels.

Duration, Timings & Numbers

The optimum "contact time" for this training is seen as 26 hours with classroom-based instruction as the primary delivery style.

The total contact time per day will not exceed 8 hours. The total training day will not exceed 10 hours.

The maximum number of delegates per unit is six (6).

The Course Format

Course format is classroom lecture with Q&A and interactive discussion.
